

**Taking
professional
colour printing
to the next level**

Make complex workflows simple

Print management solutions are at the heart of every model. Intelligently automate, securely print and personalise workflows with out of the box solutions.

Solutions enabled

Print management solutions are at the heart of every model – enabling you to automate workflows and improve efficiency and security. You have the option to upgrade your device with intelligent Brother and third-party solutions, including integration with industry leading providers Kofax, YSoft and PaperCut MF. This gives you complete flexibility in how you manage, secure and control your documents.

Premium colour

Our most advanced colour printing technology is guaranteed to make the right impression when it counts, with vibrant, professional colour prints and accurate digital capture using advanced image processing. The highly efficient fuser unit works seamlessly with the next generation toners. Producing a premium, glossy finish with high colour density to each document, every time.

Secure by design

As working conditions change, security is more critical than ever. That's why each single function printer and all-in-one multifunction device come equipped with a range of features that deliver enterprise level security.

To safeguard data against loss or theft, Transport Layer Security (TLS), Secure Socket Layer (SSL), IPsec and Scan to SSH Server (SFTP) are supported so that your most confidential files transfer using up to 256-bit encryption during transmission over the network. Using automatic intrusion detection, devices recognise abnormal activity and take preventative measures in order to ensure the device remains secure.

In addition, identity management and access controls help to reduce risk with selective user restriction, only allowing authorised employees or groups to get instant access to specific settings and functions they need.

Engineered for performance

The robust design, upgraded memory and long-life components provides confidence your device keeps on performing without interruption.

With fastest in class 2-sided scanning speeds of up to 100 ipm, physical documents are easily transformed into digital files with precision clarity.

Twin laser technology enables productivity to be greatly improved. With a first print out time of less than 10 seconds and a duplex print speed of up to 40 pages per minute, you are never kept waiting for that important document.

Contract printing that looks after itself

Managed Print Services (MPS) enable you to get the best out of your devices. That's why each printer has been designed with MPS in mind.

The standard inbox toner allows you to print up to 9,000 pages in black and 6,500 pages in colour, giving you optimal efficiency right from the first page. MPS helps to save you money, with lower ongoing running costs. You'll also get more control with real-time reporting tools and higher efficiency as workflows are streamlined and easily scalable. The real-time data also enables you to monitor your environmental impact, helping your business to meet its sustainability goals. Plus, automated benefits such as monitoring print behaviour and toner replenishments help to optimise your print experience, while innovative security protects against any threats you may face. And it's all really simple – once set up, you can sit back and let it do the heavy lifting for you.

Unlock new possibilities with Brother Pro-Upgrades

Workflow Solutions

Personalised printer touch screen

Make time consuming and complicated document filing and archiving simple with Custom UI. Create specific workflows for frequent 'scan-to' destinations on the fully customisable touch screen, enabling your files to be saved to the correct location in one touch.

Automatically route documents with barcodes

Reduce the labour-intensive task of scanning many documents, saving and then renaming files. Barcode Utility enables documents that have a barcode to be scanned and saved to the required location, automating the separation of a batch of documents and routing each individual file to the designated folder on your network.

Printing barcode fonts with ease

Brother's Barcode Print Plus enables you to easily print barcodes from your Brother printer. You simply supply your printer with the information for the barcode, the barcode is then printed exactly as it should appear. The quality of the barcodes reflects Brother's exceptional printing standards. So, they are read with ease by a variety of barcode readers.

Security Solutions

Simple and secure pull printing solution from any printer in your fleet

Instead of sending your confidential print job to a single printer, Secure Print Advance stores all print data in a common network folder where you can securely collect the print job from any activated .Brother printer within the fleet print.

Device Management

Remote device support

Remote Panel operates in real-time, offering a complete interactive interface to your printing device. Your IT provider can access the full functionality of your printer, to quickly diagnose and resolve any issues and enable settings to be changed as if they were physically standing at the printer.

Diagnostic reports for IT administrators

Request Help is a Brother service that enables your IT administrator or service provider to easily troubleshoot errors that may occur. You simply press the 'Request Help' icon on the control panel and a full diagnostic report is created and automatically emailed to your IT administrator.

*The above solutions do not come as standard on the device. For more information on how to access these solutions please contact your local dealer.
